OPEN (TRANSPARENT) SCIENCE
scientific process and results should be visible, accessible, and understandable

OPEN (INCLUSIVE) SCIENCE
process and participants should welcome participation by and collaboration with diverse people and organizations

OPEN (ACCESSIBLE) SCIENCE
data, tools, software, documentation, and publications should be accessible to all (FAIR)
Findable * Accessible
Interoperable * Reusable

OPEN (REPRODUCIBLE) SCIENCE
scientific process and results should be open such that they are reproducible by members of the community

Open Science is:

- ❖ TRANSPARENT
- ❖ ACCESSIBLE
- ❖ INCLUSIVE
- ❖ REPRODUCIBLE

NASA TOPS - Transform to Open Science

NASA'S 5-Year Plan to accelerate Open Science practices.

Roadmap:

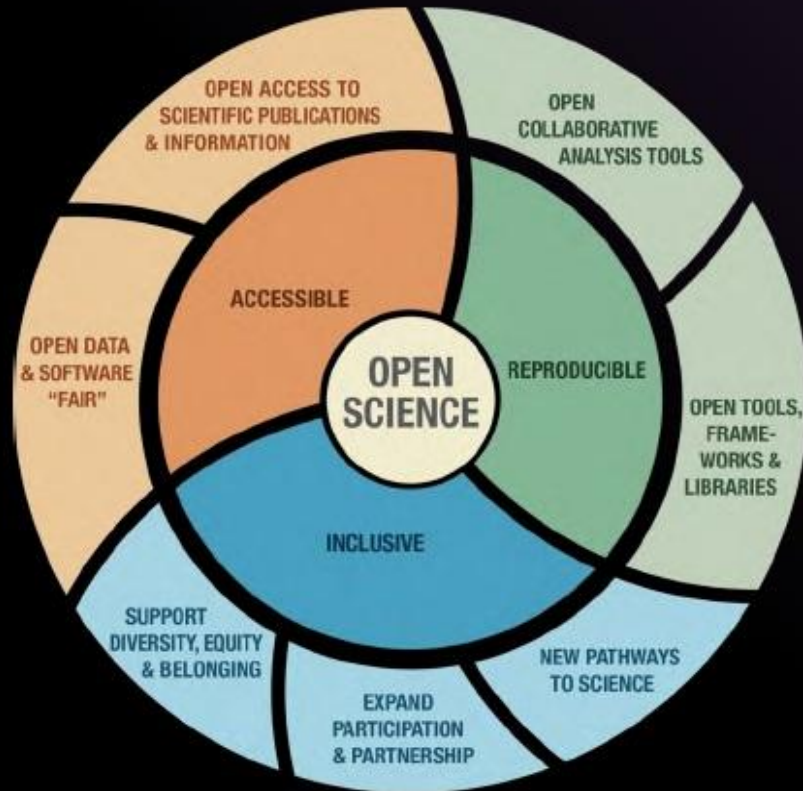

- ❑ Enable 5 major scientific discoveries through open science principles
- ❑ Broaden participation of historically excluded communities - Double the participation of these groups across NASA Science
- ❑ Increase understanding and adoption of open science principles and techniques
- ❑ Support 20K researchers to earn NASA's Open Science badge
- ❑ Accelerate major scientific discoveries

We need more WE science, rather than ME science. Openly sharing data, software and results.- Yale

Open Science is Accessible, Reproducible & Inclusive

Creates research that is:

- Cited more
- Has a bigger impact
- Increases transparency
- More inclusive

Inclusive science means more:

- Collaborative projects
- Access to 'hidden knowledge'
- Equitable Systems
- Increased Participation

*slide credit: Chelle Gentemann, TOPS Program Scientist

We need more people - more hands, more eyes, more brains.

'More people with diverse experiences to participate so that we ask the best questions and find the best solutions.'

Infrastructure

POLICY

Outreach

2023 Is The Year Of Open Science - Open.Science.gov

The U.S. White House declared 2023

The Year of Open Science

In May & June of 2023 they held a series of Listening Sessions, open to the public and accessible online, where diverse stakeholders offered their insights into the implementation process and goals of Open Science.

- **Early Career Researchers**
- **Academics**
- **Entrepreneurs**
- **Publishers**
- **R&D**
- **Government Agencies**

UNESCO Tool Kit for Open Science

The UNESCO [Open Science Toolkit](#): designed to support implementation of the UNESCO [Recommendation on Open Science](#), the first international standard-setting instrument on open science. This Recommendation was adopted by 193 countries in November 2021 at the 41st session of the UNESCO General Conference.

Article >

UNESCO's toolkit can help accelerate the transition to global open science

From CNRS: Centre National Recherche Scientifique

National Plan For Open Science

Open science...involves a new way of practicing science by opening up processes, codes, methods and protocols.

Open access makes the movement towards disseminating scientific production on the internet possible.

It removes barriers to access *while maintaining the levels of protection offered by copyright.*

As open as possible and as closed as necessary

- European Commission report 2016

<https://www.science-ouverte.cnrs.fr/en/national-context-for-open-science/>

NASA & CERN Joint Open Science Summit July 2023

On April 30, 1993 CERN released the World Wide Web to the public. Tim Berners-Lee proposed this to allow scientists and researchers working all over the globe to share information quickly and accurately.

Accelerating the Adoption of Open Science

CERN-NASA Open Science Summit 2023

July 10th - 14th, 2023

CERN, Geneva, Switzerland

More information: <https://indico.cern.ch/e/os-summit2023>

Today 5 Billion+ people, more than $\frac{2}{3}$ of the world's population rely on the internet for research, commerce, entertainment and communications.

Science & Technology

'We aspire to convene these two great community efforts of the modern era, by bringing together scientists and technology developers to drive a new open era of progress.' – Alexy Khrabrov

OSSCI – Open Source Science

blockchain

= tools for Open Science

Open Science Is A Nice Idea – But How Do We Implement It?

Tools facilitated by the blockchain offer some key solutions.

- **IP NFTs**
- **Transaction Hashes that can be used as Persistent Identifiers (PiDs)**
- **Decentralized Data Storage (such as on IPFS, Arweave or Storj)**
- **On-chain Publishing**
- **Traceability of researchers' contributions**

FRONTIER REGISTRY
ALPHA RELEASE
ANNOUNCED

Frontier Registry
IP Rights On-Chain

Scientific Research. Minted. On The Blockchain.

#DeSci

Scientific Research

Frontier Registry - Explainer Video

Open Science + Blockchain

DeSci

Or 'Decentralized Science'

The term DeSci is still being defined by the ecosystem.

But it often implies use of DeFi tools such as tokenized data. It is a very young movement, gaining traction since Spring 2022.

Blockchain for Science

Blockchain tooling for Open Science Implementation

More broadly interprets uses of the blockchain for scientific research and sharing.

Such as for FAIR (Data)

Findable

Interoperable

Accessible

Reusable

Activité : Open Science Café

1. Join together in Groups of 4 to 5 people
2. Choose an urgent Scientific Need (ex: cure cancer)

Solve For:

- Accessibility
- Transparency
- Reproducibility
- Inclusivity

Apply Open Science + Blockchain Tooling
(Suggestions - infrastructure, outreach, funding)

- A. Data Sharing
- B. Collaborate on Intellectual Property
- C. Deliver Aid rapidly and with traceability to Disaster Victims
- D. Climate Relief/ Energy Justice
- E. Re-plant wildfire devastated lands
- F. Share Knowledge but protect IP rights of researchers/ institutions
- G. Anonymous Peer Review but with authenticated decentralized identity

FrontierDAO

Use Case

blockchain for
Open Science

Accelerating scientific
research and collaboration
through open science tools
enabled by blockchain & AI.
