## Information for Artists and Creatives

Welcome and thank you for considering submitting your unique digital collection to FrontierDAO. At FrontierDAO, we strongly believe in supporting ground-breaking scientific research and phenomenal artists, like yourself. To better understand the

process, we've put together this short 1-2-3 step guide. I hope you find it useful. As someone that's also new to cryptocurrencies and non-fungible tokens (NFT), I know it can be daunting. Please let us know if we should update this tutorial with any other information. Thanks.

### Why Would I Mint an NFT with FrontierDAO?

FrontierDAO is the only decentralized autonomous organization (DAO) and NFT minter that is focused on contributing funds to further space, fusion and other scientific efforts. First let's define what a DAO and NFT are.

DAO: "A decentralized autonomous organization (DAO), sometimes called a decentralized autonomous corporation (DAC), is an organization represented by rules encoded as a computer program that is transparent, controlled by the organization members and not influenced by a central government. A DAO's financial transaction record and program rules are maintained on a blockchain."

NFT: "A non-fungible token (NFT) is a unique and non-interchangeable unit of data stored on a digital ledger (blockchain). NFTs can be associated with easily-reproducible items such as photos, videos, audio, and other types of digital files as unique items (analogous to a certificate of authenticity), and use blockchain technology to give the NFT a public proof of ownership."

FrontierDAO believes NFTs must have 4 aspects to drive maximum value for purchasers/collectors:

1. Collect and trade unique NFTs in space exploration, fusion energy & other scientific fields
2. Own limited-edition collections (Bronze, Silver, Gold, Platinum, and Evergreen + Special Collections)
3. Join an exclusive global club of like-minded Frontier *Bounders*
4. Make a positive impact on the world: Help fund innovators and further scientific research by voting on the distribution of DAO Treasury proceeds

With the purchase of a Frontier NFT, FrontierDAO members gain unique access to exclusive events such as physical and virtual events, up-to-date information in the science community, and in-depth engagements with leaders in the field. FrontierDAO is also committed to distributing the majority of funds to the original creator and to scientific efforts that push the boundaries of science and propel humankind forward. To understand how this happens, we have instituted the following sales proceed structure:

- Initial sale
  - 35% to original creator
  - 65% to DAO Treasury

# Frontier NFTs - FrontierDAO

---

- Every 7<sup>th</sup> of each collection series (every 7<sup>th</sup> sale of a Bronze image, every 7<sup>th</sup> sale of a Silver, etc.)
  - 35% to original creator
  - 65% to Founders
- Recurring sales
  - 3.5% to original creator
  - 3.5% to DAO Treasury
  - 3% to Founders

Funding to the Founders allows for continued support to the community, curating new works, plan future activities, and promote the DAO. Because of the nature of NFTs and FrontierDAO, the more engaging the community, from all participants, the more desirable the NFTs and the increased ability to resell your NFT, if you choose.

## [I'm a Creator/Scientist/Engineer - How Do I Get My Digital Asset Minted With FrontierDAO?](#)

### **What Can Become an NFT?**

So you've decided to engage FrontierDAO as a creator. But where to start? When you're thinking about a potential digital file to become an NFT, it's really wide open. It could be an image (jpg, png, Tiff, etc.), an audio file (.mp3, .wav), a short video (gif, mp4), etc. Consider how that item might be appreciated in the digital space. Is it high resolution? Would it look good on a computer or a large TV screen? A billboard?

In the future, instead of hanging a painting on the wall, big screen TVs can be dedicated to showing someone's NFT collection. Bigger yet, how could this item be used in a future Metaverse. For a preview of the Metaverse, take a look at Axie Infinity, or you can watch the recent movie, "Ready Player One." While the book is better than the movie (as is most often the case), the movie depicts multiple uses for a Metaverse. The Metaverse can be used for education, gaming, meetings, conferences, concerts, shows, etc. NFTs that showcase well or can be used in the Metaverse will appreciate more in the future. And remember, with NFTs, as the original creator, you get a portion of 'royalties, meaning all secondary sales...forever!

### **What to Do Next?**

The next step is as simple as sending us your copyright owned (by you) digital file along with a small caption to include in the listing. Example, for .jpgs set to highest resolution possible and no smaller than 1 MB. The caption can explain the piece and the artist. Send us an email first on our website [FrontierDAO.xyz](https://FrontierDAO.xyz) to let us know what you have in mind. Files are best to send via WeTransfer or DropBox. File name must include artist name, name of file and date. That's it!

It's that easy. FrontierDAO can also discuss other innovative ways to use NFTs such as for event tickets, as Swag for your event attendees, and also as keys to unlock your real world merchandise (buy an NFT, get a t-shirt, book, etc. too) FrontierDAO will handle minting the NFT and distributing funds. Funds distribution is easiest directly through cryptocurrency or through a PayPal account, however other arrangements can be made to send to a traditional checking account. We take care of it all!

## Where to See Your Works?

Currently all works are minted and sold on OpenSea.io. However, FrontierDAO is continually looking at additional platforms as the industry matures.

Let us know if you have any questions. Email us your query, then DropBox or WeTransfer us your digital file, associated caption and metadata and get started today. **We cover any upfront minting costs as part of our earned commission.**

Finally, the more engaging the community, the more valuable the NFT. Don't stop at the initial digital file submission. Get involved and connect with us and other like-minded Frontier *Bounders* throughout the world!
